RE: Water and Sewer Line Replacement Grants and Loan Program

Dear Resident,

We are pleased to inform you that as part of the 2022 Water and Wastewater budget, City Council approved a Water and Sewer Line Replacement Grant and Loan Program for Port Colborne property owners.

With their approval of this program, Council requested that the program be offered to property owners located on streets where the watermain and/or sanitary sewer were being replaced first. The Erie Street watermain replacement project is well underway, so by way of this letter we are pleased to provide you with information about the grant and loan program and give you an opportunity to participate. Please find included an information package about the new Water and Sewer Line Replacement Grant and Loan Program. If you are interested in participating, the deadline to apply is **Monday, October 31, 2022**. After October 31, we will open the program to property owners throughout the City, and applications will be accepted on a first-come, first-serve basis.

It is important to note that under Provincial construction regulations, the City's contractor has control of the construction site during the watermain project. Therefore, property owners must wait to schedule their private water and/or sewer line replacements until the City's contractor has completed the watermain project and all grant and/or loan approvals will be valid for twelve (12) months to assist property owners in planning.

Please read the attached information package for more details. This information package, including our online application form, can be found on our website at www.portcolborne.ca/watergrantsandloanprogram or by scanning the QR code.

Any questions or concerns, please feel free to contact my office.

Sincerely,

Darlene Suddard
Manager of Water/Wastewater
